RENTAL PROVEN QUALITY

REINFORCED BASE AND EDGES

The base is stronger and easy to repair. The edges have been reinforced to support the ski structure and allow several ski tunings.

GROOVE TECHNOLOGY

Learning how to ski can be a balancing act between two forces of nature: gravity and snow. Groove Tech harmonizes balance and control with rib-shaped energizers that create a uniform flex profile, helping skiers find the stability they need to progress from going fast to go even faster

SINTERED RUNNING BASE

Made with sinter process to improve the glide and wear characteristics of skis and snowboards in the high quality market segment. It increases performance from bases in different snow conditions taking up from 20 to 35% more wax as extruded running bases resulting in longer maintenance cycle. Both types of running bases can be repaired the same way while sintered bases are less sensitive.

HD POWER SHELL EXPLANATION

Featured only on Elan rental skis, the HD Power Shell exceeds rental industry standards with an extra thick top sheet for extreme durability, scratch and chip resistance and long-lasting performance for years of use. The HD Power Shell is also not only easy to clean and maintain but customizable with a specific spot where rental shops can place its own logo sticker for increased recognition in the shop and on the slopes.

GROOVE
TECHNOLOGY

RENTAL TECHNOLOGY

Element skis make good skiers better by providing a stable skiing platform offering a higher degree of forgiveness that brings the skier into a balanced position for an easier and better experience. Element Skis are equipped with Groove tech that ensures balance and control in every turn. The Power shell provides stability at speed; making them the perfect choice for skiers of all levels. While the Power shell provides stability, Parabolic rocker makes promotes easy turn initiation, that allows fast progression

- 1 COLOR CODING**
For easier and faster handling.

- 2 PARABOLIC ROCKER**
For easy turning.

- 3 GROOVE TECHNOLOGY**
For all-time balance and control.

- 4 HD POWER SHELL**
Edge reinforced cap construction.

GRIP
WALK

You can GripWalk with Elan! The entire adult Fusion, Quick Trick, Shift and Rental bindings are fully GripWalk compatible and can be used with Alpine ski boots (ISO 5355) and GripWalk ski boots (ISO 9523).

Gripwalk bindings can be used for both – adult alpine and GRIPWALK ski boots.

No specific GRIPWALK height adjustment is necessary.

Uncompromising skiing performance and safe release-retention settings with both ski boot sole types.
